JEBILIN D.M

+91 9080510225 | dmjebilin@gmail.com | linkedin.com/in/jebilin7 | Chennai, India

PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering undergraduate (2023–2027) with a foundation in Python, HTML, and CSS. Independently built a full-stack college management website (React, Python, MongoDB) using AI-assisted development tools to handle requirements, coding, and integration. Completed two Python development internships, strengthening core programming and debugging skills through hands-on tasks. Quick learner with strong problem-solving and communication skills, seeking an entry-level Software Development role.

TECHNICAL SKILLS

- Languages & Core: Python (basic, incl. OOP concepts), HTML5, CSS3, SQL (basic – DDL, DML, DQL, DCL, TCL)
- AI-Assisted Development: Built full-stack features (React.js, MongoDB) using AI coding tools for implementation and debugging
- Familiarity with: Git/GitHub, debugging fundamentals, prompt-driven development workflow
- Soft Skills: Problem-Solving, Communication, Time Management, Adaptability, Leadership

PROJECTS

StudentSphere – College Management Website

Technologies: React.js, Python, MongoDB | Built using AI-assisted development tools | Live: web-service-lake.vercel.app

- Independently designed and built a full-stack college management website with 3 role-based portals: Admin, Teacher, and Student.
- Directed AI-assisted coding tools to implement the React.js frontend, Python backend, and MongoDB database, managing prompts, testing, and integration.
- Structured attendance, marks, and notice modules across all 3 portals, verifying and debugging AI-generated code before deployment.
- Tracked all changes using Git and delivered a working, publicly hosted prototype end-to-end.

TrizenPhotos – Full-Stack Photography & Gallery Platform

Technologies: React 19, TypeScript, FastAPI, Python, MongoDB Atlas, JWT, Vercel, Render | Built using AI-assisted development tools | Live: trizenphotos.vercel.app

- Directed AI-assisted tools to engineer an event photo delivery system with real-time upload, team curation, and client delivery.
- Designed secure, PIN-protected client portals with slug routing, removing account creation friction for end users.
- Built async REST APIs with FastAPI, covering JWT authentication, role-based workflows, and Pillow-based thumbnail generation.
- Automated deployment across Vercel and Render, verifying 100% passing integration and unit tests.

INTERNSHIP EXPERIENCE

Junior Python Software Developer Intern | Judah Code Technologies *May 25 – Jun 25, 2026*

- Completed a 1-month, part-time virtual internship applying Core Python: data types, conditionals, loops, functions, file handling, exceptions.
- Wrote and debugged Python programs, solving assigned problem statements and meeting every deadline.

Python Developer Intern | Intern Infobyte *Jun 10 – Jul 10, 2026*

- Completed a 4-week, part-time internship (overlapping the final 2 weeks at Judah Code Technologies).
- Resolved real-world Python tasks, sharpening debugging and problem-solving within set deadlines.
- Recognized for outstanding performance and dedication throughout the internship.

CERTIFICATIONS

- Junior Python Software Developer Intern – Judah Code Technologies (Virtual Internship, May 25–Jun 25, 2026)
- Python Developer Intern – Intern Infobyte (Virtual Internship, Jun 10–Jul 10, 2026)

EDUCATION

B.E., Computer Science and Engineering *2023 – Expected 2027*

Anand Institute of Higher Technology

LANGUAGES KNOWN

Tamil, English
